

Introducing Cancer Advocate Plus

Chubb is excited to introduce an innovative, first-of-its-kind genetic cancer program, designed to manage cancer risk and provide a personal, precise, proactive and confidential way for employees to manage their health.

Innovation in Medical Advancements and Insurance

Using insights gained from genetic testing, Cancer Advocate Plus puts employees in the best position to manage the disease.

It's a program that helps provide access to personalized care. Here's how it works.

A diagram illustrating the Cancer Advocate Plus program. It shows a circular flow of information. On the left, there are two document icons. An arrow points from them to a central area containing a bar chart icon and a speech bubble icon. From there, an arrow points to a document icon with a checkmark on the right. A dashed line connects the checkmark back to the start of the cycle. The Chubb logo is visible in the bottom right corner of the section.
